DETAILED ACTION

Claims 1-17 remain pending in the application.

Election/Restrictions

Claims 1-3 and 5 remain withdrawn from the merits as being drawn to an invention non-elected with traverse in the response filed on 4/18/08. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Applicant has cancelled the species of *Curcuma longa*, which was previously examined. Therefore, the Examiner has chosen another species for examination on the merits; *Citrus limon* (lemon) extract. Because claims 9, 11 and 13 are not directed toward the elected invention, these claims are properly withdrawn from examination.

Claims 1-3, 5, 9, 11 and 13 are withdrawn from examination as these claims are directed toward a non-elected invention.

Claims 4, 6-8, 10, 12, 14-17 were examined on their merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 9, 10, 12, 15, and 17 are rejected under 35 U.S.C. 102(b) as anticipated by Yoshizawa (JP 60246309 A).

Yoshizawa (JP 60246309 A) disclosed a skin lotion for inhibiting damage to the skin, which comprised, *inter alia*, 0.1-.30% of lemon juice (see English abstract, a full translation has been ordered). Hence, Yoshizawa taught administration of lemon juice (*Citrus limon* fruit extract as Instantly claimed) to the skin which must have inherently performed the function of increasing an expression level of Rho kinase or myosin light-chain kinase.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1655

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4, 6-8, 10, 12, 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshizawa (JP 60246309 A).

The teachings of Yoshizawa were discussed *supra*. Yoshizawa did not expressly teach the area of skin to be treated as Instantly claimed.

Although the prior art does not specifically teach the measurements of the surface area to be treated, the ordinary artisan would have been motivated to vary the amount of product administered to the skin dependant on the amount of surface area in need of treatment in order to maximize efficacy of the cosmetic composition.

The Supreme court has acknowledged that:

When a work is available in one field of endeavor, design incentives and other market forces can prompt variations of it, either in the same field or a different one. **If a person**

Art Unit: 1655

of ordinary skill can implement a predictable variation..103 likely bars its patentability...if a technique has been used to improve one device, and a person of ordinary skill in the art would recognize that it would improve similar devices in the same way, using the technique is obvious unless its actual application is beyond that person's skill. A court must ask whether the improvement is more than the predictable use of prior-art elements according to their established functions...

...the combination of familiar elements according to known methods is likely to be obvious when it does no more than yield predictable results (see *KSR International Co. v. Teleflex Inc.*, 82 USPQ2d 1385 U.S. 2007) emphasis added.

From the teachings of the references, it is apparent that one of ordinary skill in the art would have had a reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole was *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, as evidenced by the references, especially in the absence of evidence to the contrary.

Conclusion

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
